GCC COVID-19 RISK ASSESSMENT PROCESS FOR SCHOOLS & EDUCATIONAL SETTINGS

(Revised for full reopening in March 2021)

Stone with Woodford C of E Primary School

Red = School Measures Taken

Blue = Actions to be taken before March 8th

Schools completed COVID-19 risk assessments when they reopened for priority groups during the summer term and implemented protective measures recommended by DfE and PHE. Now that the Government requires schools to plan for all pupils in all year groups to return to school full-time from the beginning of the autumn term and implement a 'system of controls', the GCC COVID-19 Risk Assessment has been updated to support schools to prepare for this. The aim of the risk assessment is to implement protective measures to prevent COVID-19 or reduce the spread of the infection if there is a positive case, both in the school and transmission to the wider community. Changes are highlighted

COVID-19 Risk Assessment for reopening schools

ASSESS

Decide appropriate control measures for managers and employees to implement under a 'Plan', 'Do', 'Review' cycle.

*The preventative measures in this risk assessment are not mandatory but are provided as guidance on reducing the risk of transmission and comply with DfE 'system of control' requirements. Each school/setting must consider their own situation and adapt the assessment by editing the measures where appropriate. Remove any measures that are not relevant or will not be applied in your setting and add any additional local measures that you are implementing. This format does not have to be used but your local risk assessment must be suitable and sufficient.

Who may be at risk: Employees, pupils and young people, families (parents, carers and siblings), visitors, contractors, members of public.

Vulnerable groups: Where schools apply the full measures in this guidance the risks to all staff will be mitigated significantly, including those who are extremely clinically vulnerable and clinically vulnerable. Some people with particular characteristics may be at comparatively increased risk from COVID-19 (due to age, deprivation, ethnicity, etc.). An individual risk assessment may be appropriate for those who are very anxious about returning to their workplace.
